# Context-Fabric 0.6.0rc1

Your Text-Fabric corpora, on a new Rust engine. Same answers. A fraction of the memory. Many times faster.

**180×**

**Less memory**

33 MB vs 6.2 GB to load the Hebrew Bible

**15×**

**Faster search**

typical speedup across 100 benchmark queries

**0.003s**

**To load a corpus**

down from 4 seconds

- **Drop-in compatible.**
  Your Text-Fabric scripts run unchanged, and the results match Text-Fabric.
- **Built to scale.**
  Worker processes share one copy of the corpus, ideal for servers and AI agents.
- **Lightweight.**
  No required dependencies. Wheels for Linux, macOS and Windows.

TRY IT TODAY

```
pip install --pre context-fabric
```

Help us get to 0.6.0: tell us about anything that differs from Text-Fabric.
